SUMMARY

Computer Engineering graduate from UCF with hands-on experience building full-stack applications using React, TypeScript, Python, FastAPI, Node.js, and PostgreSQL. Experienced in REST APIs, JWT authentication, role-based access control, and AWS deployment through individual and team projects.

SKILLS

Languages: C/C++, JavaScript, TypeScript, Python, SQL, PHP
Frontend: HTML5, CSS3, React
Backend: Node.js, Express, FastAPI, Prisma, REST APIs
Databases: PostgreSQL, MySQL
Cloud/Tools: AWS, Git, Postman, Visual Studio Code, Git
Embedded: Arduino IDE, Embedded C, Fusion 360, LTSpice

EDUCATION

University of Central Florida (Dec 2025)

- Graduated with a Bachelor of Science in Computer Engineering.

Devslopes Academy (June 2026)

- Completed an intensive full-stack development program focused on React, TypeScript, Node.js, SQL databases, REST APIs, authentication, and modern development workflows.

NOTABLE PROJECTS

JADE Bank Management System (Full-Stack Team Project)

- Collaborated in a 4-person team to build a full-stack banking application using React, FastAPI, Python, and PostgreSQL with role-based access control, deployed using AWS tools - EC2, S3, CloudFront, and API Gateway.
- Implemented JWT authentication and API security, developing backend endpoints and authorization logic to securely manage banking operations and user access.

Save Slot HQ (Solo Full-Stack Web App)

- Solo-developed a full-stack web application that allows users to interact with a collection of games managed by administrators.
- Integrated JWT authentication, role-based access control, PostgreSQL database integration, game reviews, favorites, and profile management using React, TypeScript, Express, Prisma, and PostgreSQL.

Style Tracking Expressive Pad System (STEPS) (Embedded Systems Senior Design Project)

- Designed an interactive dance pad system with 9 input tiles and embedded microcontrollers for real-time gameplay input.
- Configured embedded firmware and contributed to game logic and PCB design within a 5-person team.

Gesture-Controlled Robot Vehicle Glove (Embedded Systems Team Project)

- Engineered a gesture-controlled wearable glove system capable of wirelessly controlling a robot vehicle through hand gestures.
- Contributed with a team of 4 to implement gesture detection and wireless communication.

Steezee (AI-Powered Clothing Website)

- Created a full-stack clothing store integrating OpenAI APIs with a team of 5.
- Established backend endpoints using PHP and MySQL and tested endpoints with Postman.

WORK EXPERIENCE

Hotto Potto [Restaurant] Server (Jan 2023 – Jan 2024)

- Provided high-quality customer service in a fast-paced restaurant environment serving high customer volume.

UBER Eats Delivery Driver (September 2024 – October 2025)

- Maintained reliable delivery performance and time management while fulfilling customer orders.
